

" 4th Dimension "

Artist Rita M. W. Große-Ruyken with her work at the [Gulf Art Fair](#).

I had the absolute pleasure of meeting her in person and discussing with her, the philosophy behind her work. She is an incredibly deep thinker and a fantastic personality.

This particular sculpture of hers took years to be realized, it is made completely from gold and its thinner than tissue paper, it moves ever so delicately whenever a breeze passes by it.

When she first had created it [MoMA](#) New York wanted to buy it from her, but at the time she couldn't afford to have it taken out of her hands since it was the first experimental work of the kind.

The best way to appreciate it is truly to see it in person.

At the moment there are only 4 sculptures of the kind available in the world. I am grateful to have seen it and met with its creator.

Her work can be found at rita.grosse-ruyken.org
